

Free cardiac and high blood pressure related preventive prescriptions

Heart disease and high blood pressure related preventive prescriptions that are covered for free under MESSA ABC include medications for high cholesterol, high blood pressure and weight loss.

Preventive prescriptions can help hold down health care costs over the long term by preventing higher cost medical services like emergency room visits and hospital admissions.

The following is a list of the preventive prescriptions drugs for high cholesterol, high blood pressure and weight loss covered under this special benefit, however it is not all-inclusive. Preventive prescriptions are periodically added to the list. For the most accurate list visit the MESSA ABC area at www.messa.org or ask your pharmacist about a specific medication.
