

Free diabetes-related preventive prescriptions

Successful management of diabetes begins with taking medications as prescribed

- MESSA ABC covers hundreds of preventive prescriptions that are free — no charge to MESSA ABC members — including many prescriptions that are important to manage diabetes such as cholesterol, blood pressure and weight loss medications.
- Preventive prescriptions help hold down the cost of health care over the long term by preventing higher-cost medical services such as emergency room visits and in-patient hospital care.
- This list changes frequently as drugs are taken off the market by manufacturers and new preventive prescriptions are added. For a current list, visit the MESSA ABC area at www.messa.org, call MESSA’s Member Service Center at 800.336.0013 or ask your pharmacist to check your coverage for a specific prescription.
